Assembly instructions for the Barlooon lampion

Dear customers,
 Thank you for purchasing a Barlooon. Please retain the documents provided, even after installation.

The Barlooons are illuminated lampions which can be used both indoors and outdoors.

The Barlooon set consists of:

- Barlooon lampion
- 1 stainless steel carabiner (Art. No. BE00006375)
- 1 0.75-metre stainless steel wire with end loops (Art. No. BZ00002021)
- 1 piece of sample material in the colour of your Barlooon (may not be included with special editions)

Safety notes

Damage caused by non-observance of the assembly instructions or the cleaning and care recommendations will void the warranty. No liability is accepted for any consequential damage incurred.

- **Never** position the Barlooon near flammable materials.
- The Barlooon is decorative article and **not a toy**.
- Ensure that the Barlooon is suspended in an area where it is not an obstacle.
- Assembly and installation should only be carried out when outside temperatures are above 5°C.
- Avoid exposure to temperatures lower than -20°C and higher than +40°C.

Assembly and installation notes

The Barlooon material is UV-resistant. Nevertheless, long-term exposure to UV rays can lead to changes in the colour.

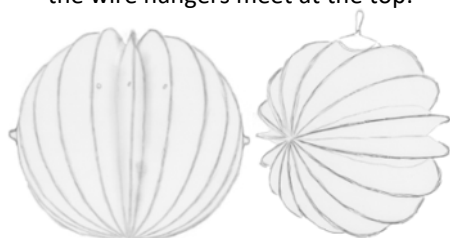

All metal parts of the Barlooon are made of stainless steel. If metal parts that can rust are used during assembly and installation, the stainless-steel parts of the Barlooon may begin to rust.

Hang the Barlooon in the desired location.

Remove the folded Barlooon from the bag. The Barlooon comes with a carabiner, which is already attached.

Open the Barlooon so that the two locking elements on the wire hangers meet at the top.

Guide the carabiner through both wire hangers.

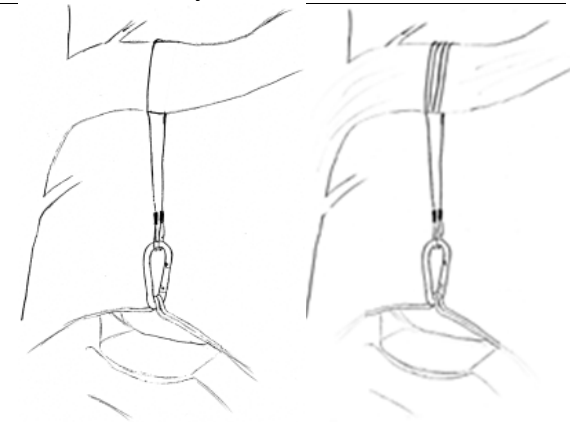

Assembly and installation as free-hanging element in a variety of locations

Hang the Barlooon in the desired place.

You can use the enclosed wire rope for this. You have a variety of options for adjusting the length of the wire rope.

Please note, however, that the wire rope must not be routed around metallic and/or sharp-edged objects, as this could damage it and cause it to break! In case of doubt, choose an alternative mounting solution or attach an additional safety device to the Barlooon to prevent it from falling down!

Attention:

When mounting the Barlooon above working or traffic areas, the relevant DGUV regulations must be observed!

When illuminating the Barlooon, please note the following:

- The Barlooon must **never** be used with an open flame such as a candle!
- When selecting a light bulb, observe the manufacturer's instructions regarding assembly and installation as well as the bulb to be used.

When using the LED solar module or the illumination and installation set, which you can purchase from us as an optional accessory, please observe the assembly and installation instructions provided.

General information

In order to be able to enjoy the Barlooon for a long time, we recommend you stow it away when you are not using it for a longer period of time.

The Barlooon should be stored in a dark and dry place that does not exceed a temperature of 40°C.

When storing, please ensure the rubber cords attached next to the eyelets are not in a stretched position. This will prevent premature material fatigue.

In order to keep the surface material of the Barlooon visually appealing for a long time, we recommend cleaning the Barlooon at appropriate intervals, based on the location and duration of outdoor use. When cleaning, please observe the cleaning and care instructions.

Disposal

Dear customer, please help us to avoid waste. If you should ever want to part with this article, please consider that many of its components consist of valuable raw materials that can be reused. Dispose of the Barlooon in the appropriate recycling bin.

Thank you for your assistance.

We hope you enjoy using your Barlooon.
